Spot Eye Problems:

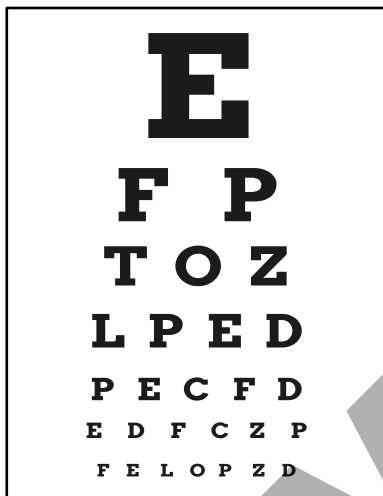

- Having trouble reading the blackboard
- Squinting
- Sitting too close to the TV
- Unable to see objects in the distance
- Eye rubbing

What Does an Eye Doctor Do?

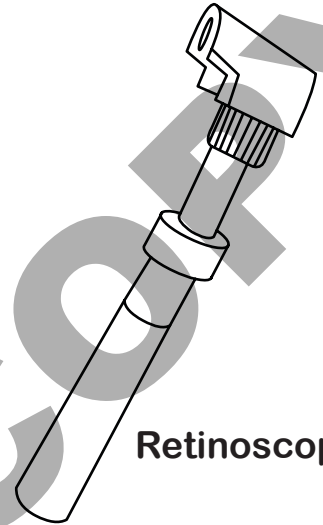

Eye Doctors - Ophthalmologists or Optometrists - check your eyes to make sure they are healthy. If you are having trouble seeing clearly they can help.

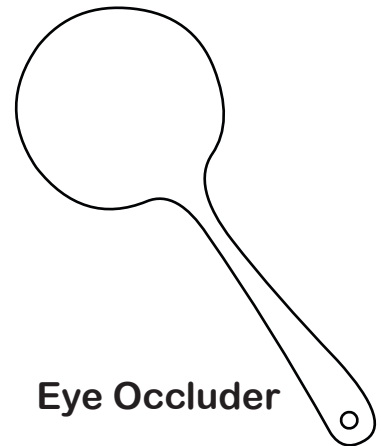

Phoropter

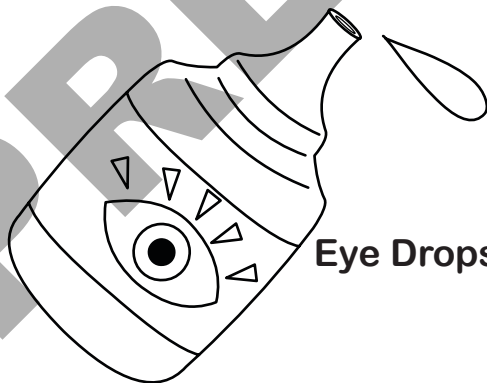

Eye Chart

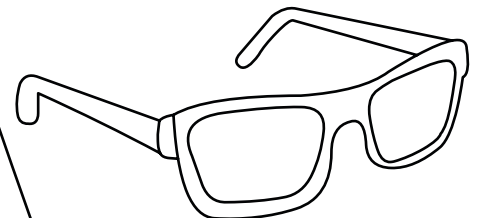

Retinoscope

Eye Occluder

Eye Drops

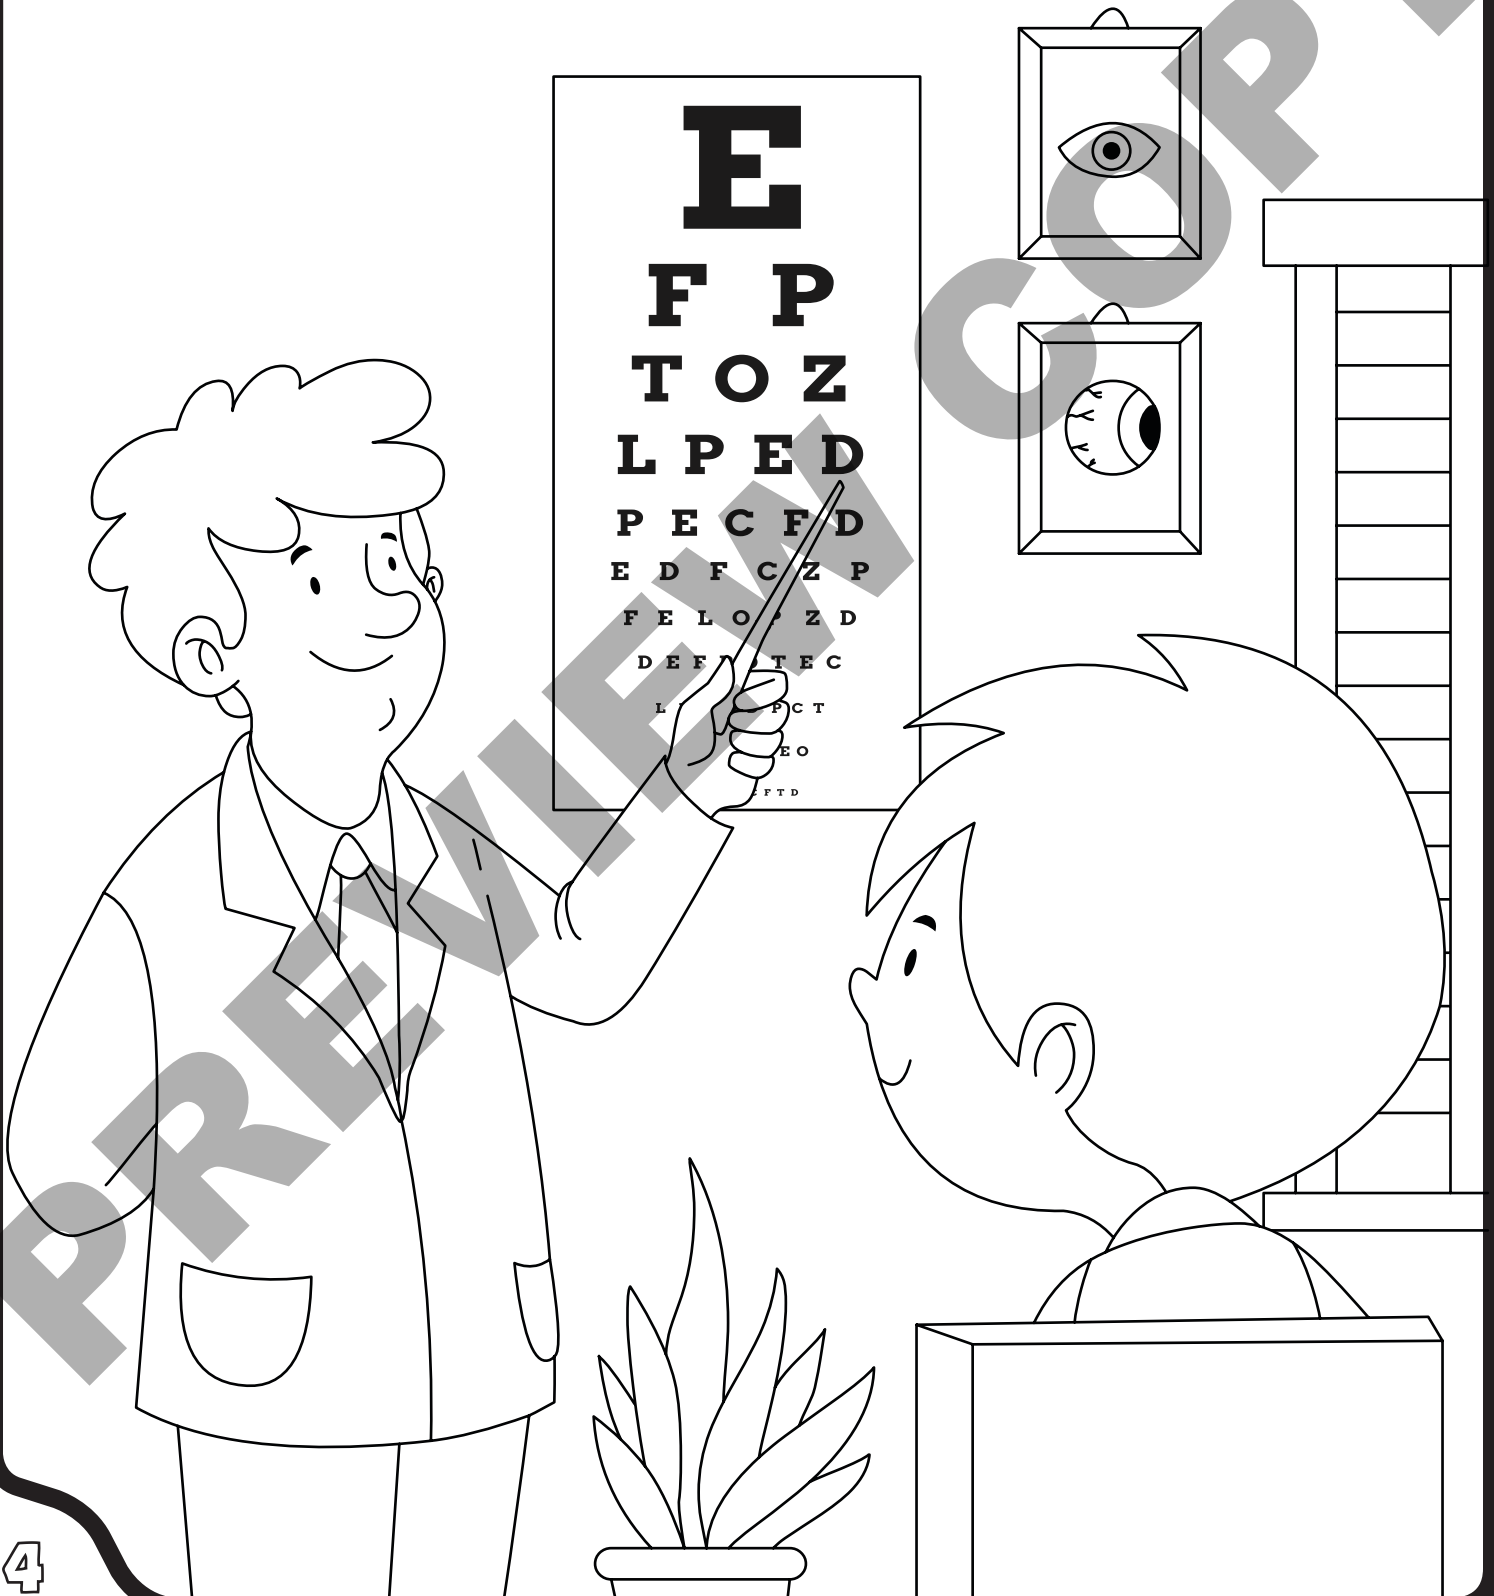

Eyeglasses

Eye Doctors use special tools to help you see better.
Color the tools an eye doctor uses.

How Far Can You See?

The Eye Doctor will ask you to read an EYE CHART to test how well you see things from FAR AWAY. The EYE CHART has a lot of letters that get smaller in size.

What is That?!

The Eye Doctor uses a tool called a PHOROPTER. You look through special LENSES that help the doctor find the right prescription for glasses to help you see clearly.

What looks better?

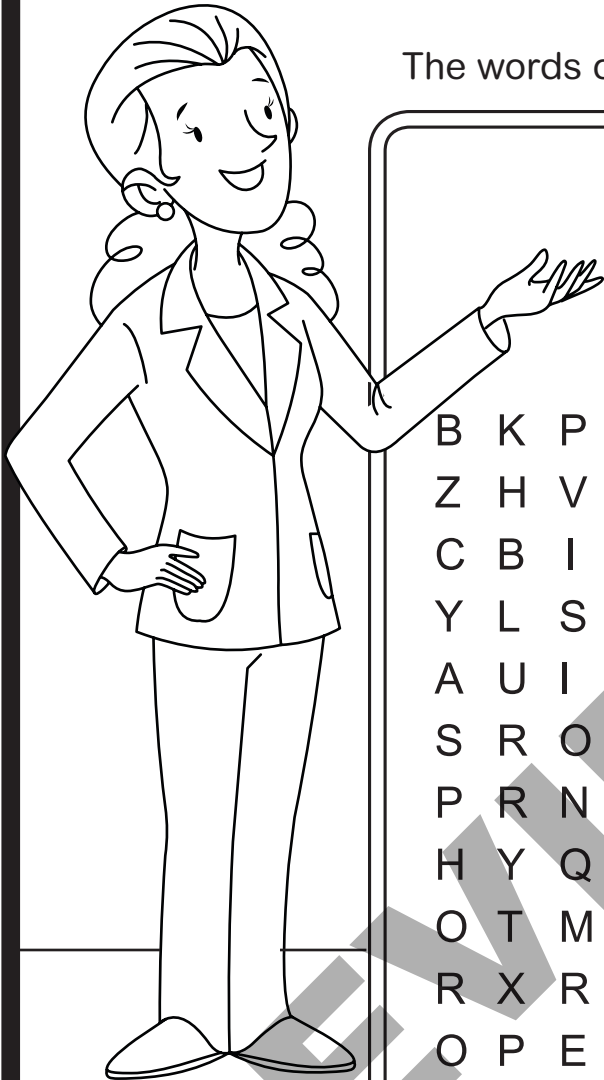

Option A or Option B?

Wow! Now I can see everything!
Thank you Doctor!

EYE SPY!

Can you find all the “eye” words in the puzzle below?

Use the word list below as a guide.
The words can be right and left, up and down, or diagonal.
