DRUGS OF ABUSE

Every year, drug and alcohol abuse costs over \$700 billion, causes over half a million visits to emergency rooms, and kills thousands. In this country more than 25 million people abused drugs in 2013, and about 16.3 million people are dependent on alcohol. Being familiar with the names and effects of common drugs is the critical first step in preventing or reducing drug abuse.

MARIJUANA

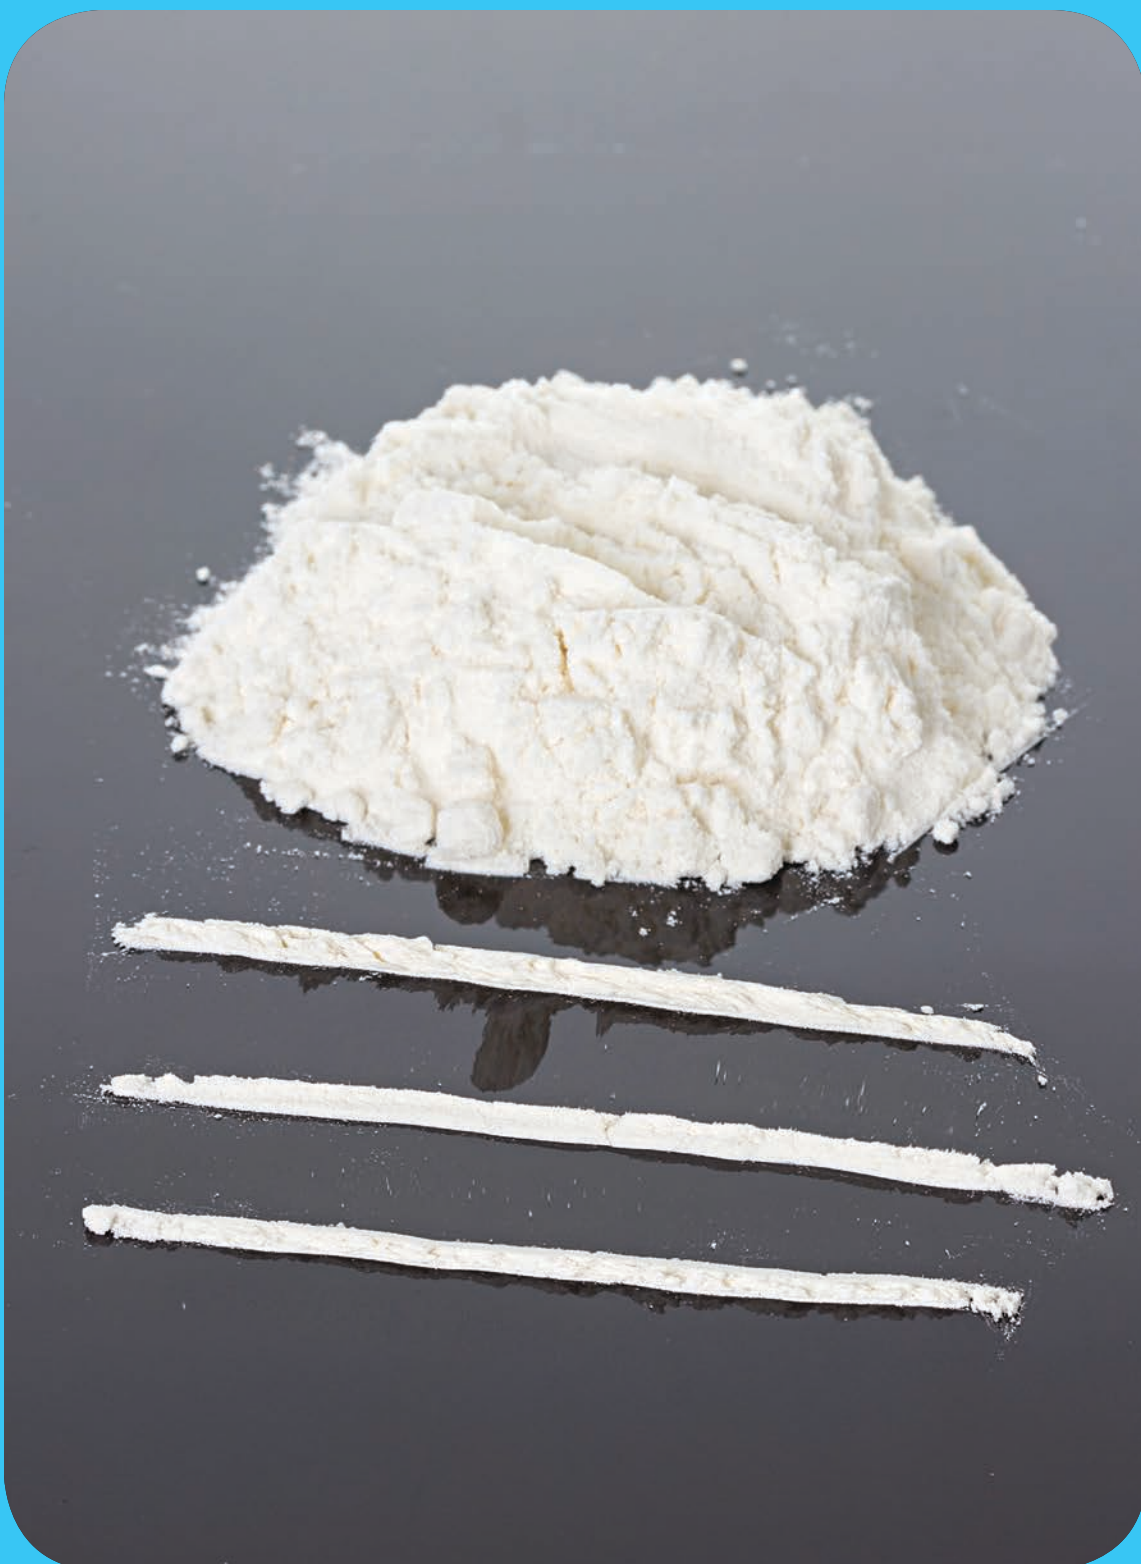

DRUGS	COMMON NAMES	METHODS OF USE	EFFECTS OF USE	LONG TERM EFFECTS	OVERDOSE
MARIJUANA	Weed, pot, grass, bud, joints, bong hits	Smoked or ingested	Poor concentration, short-term memory loss, anxiety, increased appetite.	Psychological addiction, impaired memory, low motivation, lung or oral cancer	No single use of cannabis will cause overdose. Damage occurs over time.
