

IN THE KNOW:

Alcohol

How It Affects the Body

Heavy drinking, whether on a single occasion or over time, can cause serious health problems. Excessive alcohol consumption **harms almost every part of the body**. It has been linked to **more than 60 diseases**. While most people are aware of the short-term effects of heavy drinking, like the next day's hangover, much more attention should be paid to the long-term **permanent damage** caused by alcohol.

EYES

Blurred vision
Double vision
Permanent vision loss

BRAIN

Memory loss
Strokes
Seizures
Dementia
Brain lesions
Impaired judgment
Depression
Poor coordination
Nerve damage

MOUTH + THROAT

Oral Cancer
Throat Cancer
Esophageal Cancer
Inflammation of the tongue
Tooth loss & gum decay

HEART

High Blood Pressure
Irregular Heartbeat
Cardiomyopathy
Heart Failure

STOMACH

Alcohol Poisoning
Gastritis
Stomach Ulcers
Acid Reflux
Malnutrition
Stomach Cancer
Colon Cancer
Weight Gain

PANCREAS

Pancreatitis
Diabetes

LIVER

Fatty Liver
Cirrhosis
Liver Cancer
Alcoholic hepatitis

KIDNEYS

Chronic kidney disease
Hepatorenal failure

BONES + BLOOD

Anemia
Osteoporosis
Gout

REPRODUCTIVE ORGANS

Erectile dysfunction for men
Infertility for women

DRINKING WHILE PREGNANT RAISES THE RISK OF:

Miscarriage
Stillbirth
Low birth weight
Fetal Alcohol Syndrome

Stop. Think. Don't Drink!
