

COUNTERFEIT DRUGS

KILL PILLS

5.1 MILLION Americans abuse prescription painkillers - to keep up with demand, dealers have turned to cheaper, more powerful drugs to increase supply and profits.

FAKE PILLS = REAL RISKS

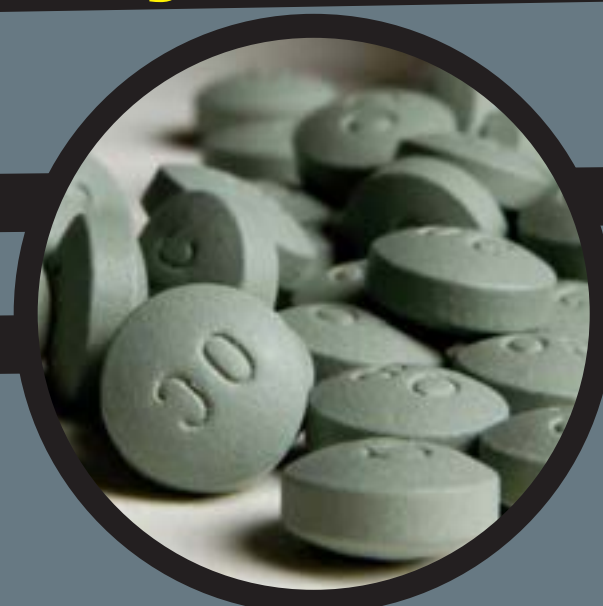

You have no idea what's in that pill. Counterfeit pills laced with much stronger synthetic drugs have been found in **42 OUT OF 50 STATES**. Most counterfeit pills are laced with Fentanyl or one of its 40 synthetic analogues.

DEATHS FROM FENTANYL AND OTHER SYNTHETIC OPIOIDS HAVE RISEN 540%.

PILLS THAT ARE COMMONLY FAKED

Oxycontin

Oxycodone

Percocet

Xanax

Norco

Vicodin

hydrocodone

These pills look **EXACTLY** like legitimate medication. They have the same shape, color and markings - **Trained pharmacists cannot tell by looking and neither can you!**

The only ones not profiting from these pills is the end user. The risk is ten-fold - **UNKNOWN CHEMICALS, UNKNOWN DOSAGES** and **STRONGER DRUGS** means the chance for **ADDICTION, OVERDOSE** or even **DEATH** skyrocket.

ADDICTION

Opioids are **HIGHLY ADDICTIVE** and when users are given powerful counterfeits it increases the chances of becoming hooked.

OVERDOSE

Drug overdose is now the #1 cause of accidental death

MORE THAN CAR ACCIDENTS & GUN VIOLENCE.

Most of these deaths are directly linked to illegal fentanyl in counterfeit drugs.

DEATH

A dose as small as 0.25 mg is enough to kill an otherwise healthy adult - **THAT'S ABOUT THE SIZE OF FOUR GRAINS OF SALT.**

Most counterfeits contain drugs that are **50 TO 100 TIMES** stronger than the user expects, triggering an overdose.

WHY MAKE COUNTERFEIT PILLS?

To make money. Counterfeiters buy cheap, illegal fentanyl from China and pill presses over the internet and create their own pills for a fraction of the cost, yet they charge the same amount as a pharmaceutical grade pill on the streets.

A multi-million dollar fentanyl lab with over **500,000** pills labeled as OxyContin and Xanax was discovered in a suburban Utah basement. **THE PILLS WERE SOLD ACROSS THE COUNTRY AND CONTAINED ONLY FENTANYL.**

200 POUNDS OF FENTANYL were seized in New York. Enough to make **32 MILLION LETHAL DOSES.**

AVOID KILL PILLS
DO NOT TAKE WHAT IS NOT PRESCRIBED TO YOU.
